

**Include:**

---

Buggy with lightweight and stylish aluminum frame  
Practical boot cover  
and practical bottle holder

**Highlights:**

---

A stylish eye catcher, with gold-colored aluminum frame and ergonomically shaped push handles.

The buggy with XXL-seat is also ideal for older children - the backrest can be adjusted to horizontal position, the footrest is multi-adjustable

large, extendable canopy

A particularly lightweight and smooth buggy with a small folded size

**Productimages:**

---

Pace - high-end, stylish and eye-catching. This high-quality buggy captivates with its gold-colored frame and the special color gradient of the fabrics. The iCoo Pace also has ergonomically shaped handles, a comfortable XXL surface for sitting and lying, a protective leg cover and a practical drinks holder.

This lightweight, nimble buggy guarantees enjoyable trips. The front wheels swivel through 360° and are also lockable. The suspension, as well as the air-chambers in the wheels, gently absorb bumps on uneven surfaces. Baby's bottle is close at hand in the practical drinks holder.

Your little one travels in comfort! With its XXL sitting surface, iCoo Pace offers optimum headroom and freedom of movement, even for older children. You can gradually adjust the backrest into a lying position with just one hand. The footrest is also adjustable. The canopy has a zip fastening for extension and can be pulled far forward over your child, to provide perfect protection against sun, wind and rain. Keep a constant eye on your little one through the viewing window in the canopy and store utensils in its large pocket. The color-coordinating leg cover provides additional protection for your child and adds the finishing touch to this premium set.

The brake reliably secures the buggy when you take a break. The soft, padded front bar and the equally softly padded 5-point belt make your child extra-safe.

There is room for nappies or other baby "things" in the shopping basket. Pace has narrow folded dimensions of 109 x 35 x 35 and can be transported by the practical loop.
